DETAILED ACTION

Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a papermaking method, classified in class 162, subclass 199.
 - II. Claims 6-9, drawn to a dewatering element, classified in class 162, subclass 263.
 - III. Claims 10-11, drawn to marking a paper method, classified in class 382, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions I and III are unrelated. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different method of operation, different function and different effect.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
